

GREENFEED™

Global Standard Emissions Measurement Tool

Measure Methane Emissions

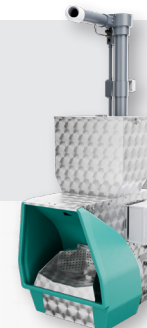

Methane Measurement Global Standard

Individual Animal Identification

Sustainability Metrics

Measure Individual Animal Emissions

GreenFeed is a turn-key system that captures and measures greenhouse gases – including Methane (CH₄), Carbon Dioxide (CO₂), and optionally Oxygen (O₂) and Hydrogen (H₂) – from individual ruminant animals. GreenFeed uses flux-based measurement technology, capturing real-time greenhouse gas output from ruminant animals. This data provides valuable insights into emissions and efficiency at the individual animal level.

- Globally Standardized
- Scientifically Validated Worldwide
- 800+ Published Studies
- Mass Flux Measurements

GreenFeed Purchase Includes

Monitoring & Protocol Assistance

Product monitoring from C-Lock data specialist.

Software Updates

Includes updates to online software and customer portal capabilities.

Customer Portal Access

Access to real time raw and processed data via C-Lock's cloud-based customer portal.

Online User Interface

Each GreenFeed can be controlled by our easy to use online interface.

Repairs

Product parts and repair are provided while equipment is on subscription.

Support

A support line to contact C-Lock for technical questions or to report problems.

Features

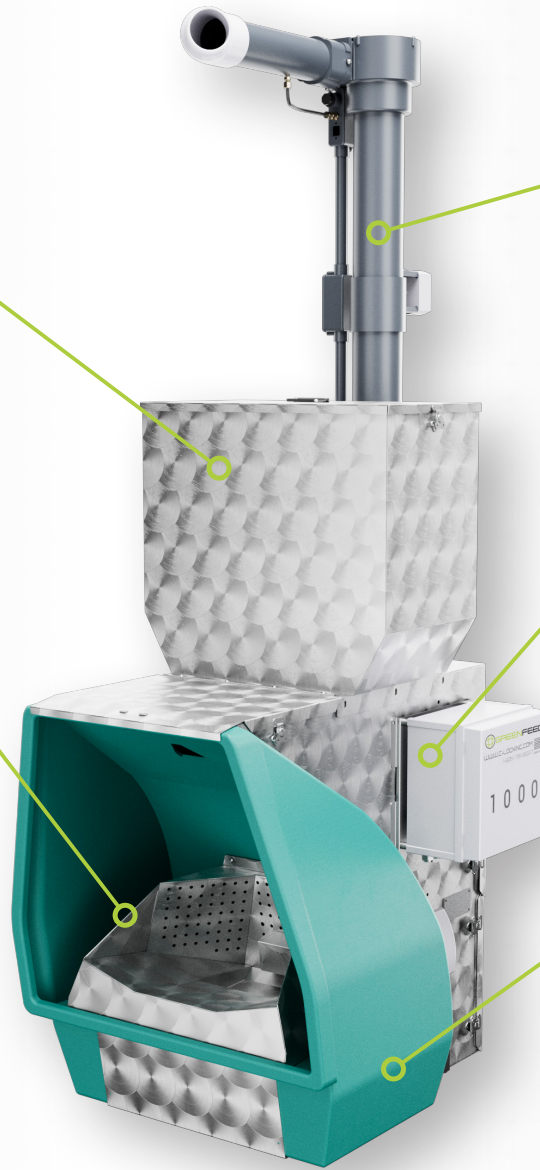

Robust Build Quality

Engineered with stainless steel and premium components, GreenFeed delivers durable, all-weather performance in demanding animal environments.

Standard Methane & CO₂ Options

Every GreenFeed unit includes integrated methane and CO₂ sensors for reliable, real-time emissions monitoring.

Build Your GREENFEED

Simple User Interface

All raw and processed data is securely stored and easily accessible through a simple online interface, with wireless transmission via Wi-Fi or cellular networks.

Auto Recovery System

Automatically resets gas baselines to maintain the highest level of measurement accuracy and data reliability.

Customizable Options

GreenFeed is highly customizable, with three system models, four transportation modes, and over 20 add-on options to fit a wide range of operational needs.
