Steps

TURN ON AND CONNECT THE READER

1. Press the green button on the RFID reader to turn it on.
2. If a scan starts on its own during startup, ignore or cancel it.
3. Wait until the QuickFlux unit is blinking blue.
4. Press the blue button on the QuickFlux unit.
5. The light turns solid blue while it connects to the reader.
6. The light blinks yellow when the reader is connected.

OPTION A: SCAN AN RFID TAG

7. Press the green button on the reader.
8. Scan the correct animal ID within 10 seconds.

OPTION B: SCAN A BARCODE

7. Press the up arrow on the reader to switch to barcode mode.
8. Scan the barcode.

CONFIRM THE SAMPLE STARTED

9. The light on the QuickFlux unit turns green. The measurement has started.
