Steps

1. Make sure the unit is running: listen for the fan and feel for airflow at the exhaust.
2. Open the app and select Start Scanning.
3. Select the QuickFlux unit when it appears.
4. Connect to the unit.
5. Log in to the unit through the app.
6. Scroll down and select Wi-Fi Settings.
7. If the unit is already connected to the right network, stop here.
8. If needed, refresh the list of available networks.
9. Select the Wi-Fi network you want to use.
10. Enter the network password.
11. Select Add Network.
12. The unit restarts. The lights turn off, then come back on.
13. Follow steps 1-7 to verify the unit is connected
